Entities that own, lease, or have any financial interest in agricultural land or land capable of being farmed must register with the MN Dept. of Agriculture's Corporate Farm Program.

Does this entity own, lease, or have any financial interest in agricultural land or land capable of being farmed?
 Yes No

Annual Benefit Report
of
Apex Facility Solutions
A Minnesota Specific Benefit Corporation

March 2, 2018

History of Apex Facility Solutions

Apex Facility Solutions was founded in 2012 as a result of our ownership team growing tired of the way Energy Service Companies delivered renewable energy and energy efficiency projects. Our new business model has changed the way our projects are developed, marketed, and delivered.

Apex Facility Solutions was incorporated as a Minnesota Public Benefit Corporation on January 2, 2015.

Apex's goal is to improve the environment by upgrading the energy efficiency of buildings, reducing both the carbon emissions and pollution that is released to the environment from these facilities. The company also serves the less fortunate by helping alleviate poverty, improving educational opportunities, providing housing and addressing the exploitation of children.

Pursuit of our Mission

With regard to the period covered by this report, January 1, 2017 to December 31, 2017, Apex Facility Solutions pursued the specific benefit purpose stated in its articles of incorporation in the following ways.

Apex Facility Solutions worked with a number of school districts to help them operate more efficiently.

- *Our work order/project management tool allows staff to alert maintenance employees of an issue in the building.

- *Facility Mapping and auditing gets management the right information to make educated decisions and accurate capital gains.

- *Our health and safety online training program ensures their staff is current on all their training requirements with all documentation complete.

- *Electronic record keeping save's their facility's records and keeps them organized without the work or the space needed for paper files.

We believe that Apex Facility Solutions was successful in achieving the goals of our specific benefit purpose in the following ways.

As one of the first Specific Benefit Corporations in Minnesota, we strive to alleviate poverty and homelessness, as well as improve education opportunities and address the exploitation of children. We tithe corporate profits into the Apex Foundation to assist with this mission.

It is our goal at Apex to continuously improve the world through the implementation of fiscally-responsible and environmentally-friendly projects. Plus, we actively work to improve the community around us and abroad by dedicating a portion of each year's profits to these causes. Half of Apex Foundation's assets are used to help in the local community. The other half of the assets are used globally to help fight poverty and injustice.

In 2017, Apex had sent 18 people on trips to work in Haiti. Each person worked in the community of Williamson for one week. In January 2017, we sent 12 people to Haiti to Survey land for a sewing building and bakery, excavate a ravine and install drainage culverts by the medical clinic, finalized drawings for the clinic and the "abandoned kids home" that will be complete in 2018. Of those on the

trip, 10 people hiked up to a remote Mountain village, Nikola, to meet with the Pastor and head teacher at the village's schoolhouse. Apex employees wanted to offer financial support to help where they needed it the most. It was decided that our help was desperately needed to close the gap in the teachers' pay. Many of the teachers had already left due to lack of pay, our support would mean keeping quality teachers employed so the children can have a great education. Additionally, 4 people on this trip rewired electrical lines in five residences homes in a town called Archaea. Clothing measurements were also taken for Pastor Joissant's 5 children and the 10 abandoned children he has taken into his Williamson home over the last few years. These measurements would be used at Grace Lutheran Church for a clothing drive for the family.

In February 2017, one individual went to Haiti to work in Williamson for one week. While there this individual helped to start on the digging/drilling of a second well for the community. It is located right down the road from the school and will soon be used to supply fresh water at the school, as well as for the community members.

In June 2017, 2 individuals went to Haiti to work in Williamson. One person was there for one week, the other stayed for two weeks. While on this trip, the main project was the installation of solar panels at three local Haitians residences, as well as at the guest house where all World Wide Village's teams stay on their trips. In addition to the solar panels, they also met with the Pastor and teachers from Nikola, the Mountain Village that Apex employees are sponsoring. This was to discuss how things were going since our January visit, and to see what additional needs they may like our assistance with.

CERTIFICATION BY THE BOARD OF DIRECTORS

The undersigned, being all the directors of Apex Facility Solutions, herby acknowledge and certify that we have reviewed and approved the enclosed First Annual Report.
