Inspired Spine SBC's mission is to displace the current global standard of care for back pain treatment with its advanced protocols and minimally invasive procedures which have been documented and demonstrated to deliver unparalleled and superior patient outcomes. As stated in Inspired Spine's articles of incorporation, this mission includes delivering this standard of care to the world, starting with the State of Minnesota. In this regard, Inspired Spine devoted substantial resources in 2017 to:

- Inform back pain sufferers about Inspired Spine's superior treatment options via awareness and education campaigns (digital and traditional media), increasing demand for this standard of care by 110% versus 2016;
- Recruit spine surgeons to learn the techniques and commence practicing and refining the corresponding protocols – five surgeons commenced training with one surgeon achieving certification proficiency (currently two (2) surgeons are Inspired Spine Certified, including the current Surgeon-Trainer, and five (5) surgeons in various stages of training);
- Publish three (3) peer reviewed research papers on the clinical outcomes of Inspired Spine's surgical techniques to provide objective and quantitative evidence of this standard of care's superiority (evidence based medicine).

Through these efforts, Inspired Spine has substantially increased the number of its minimally invasive procedures performed in Minnesota. In so doing, Inspired Spine has delivered both clinical and economic benefits due to substantially shorter surgery durations, shorter post-operative hospital stays, and minimal rehabilitation requirements (patients are back to work in two to three weeks versus two the three months after surgery).
