Corporate Name: Binary Bridge, SBC

Report Dates: January 1, 2019 - December 31, 2019

Purpose: To increase access to healthcare and improve the quality of care in underserved

communities

IMPACT

At the end of 2019, we had 12 organizations actively using BackpackEMR across 19 countries. These clinicians have recorded 35,000 patients, distributed 160,000 medications, logged over 20,000 return visits, and tracked 5,700 follow-ups/referral requests. Ongoing healthcare for these individuals will be improved with access to past medical histories and the ability for clinicians to track referrals and followups needed. Additionally this information will be collated with other health data tracking to better distribute limited medical supplies.

UNITED NATIONS SUSTAINABLE DEVELOPMENT GOALS (SDGs)

The following SDGs and Targets are addressed with this program:

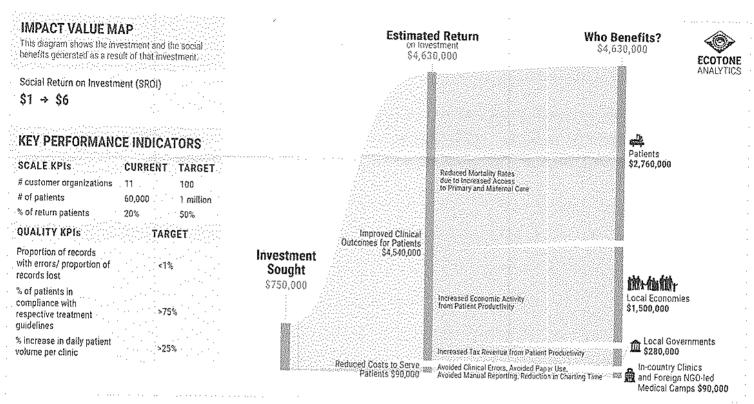

3.1, 3.2, 3.3, 3.4, 3.8

12 CUSTOMERS | 19 COUNTRIES | 35,000 Patients

IMPACT MEASUREMENT

Ecotone Analytics created an Impact Measurement report for Binary Bridge, and we are able to show that for every \$1 invested in Binary Bridge, BackpackEMR provides \$6 of Social Return On Investment (SROI). We'll continue to measure our impact as we grow to further refine and validate those numbers.

Underlying impact from the research: Tracking patient medical histories electronically can improve patient outcomes, reduce costs, and increase general public health.

			IMPACTS
SHORT TERM Outcomes	INTERMEDIATE Outcomes	LONG TERM Outcomes	Improved health for those
Increase capacity to see more patients	Increase in patients served	Reduced costs from fewer errors and omissions	previously excluded from healthcare advancements
Easier and more accurate	Increased accuracy in treatments/prescriptions	Improved clinical outcomes due	Reduced mortality rates
prescription filling Ready access to patient	Reduced staff time for recordkeeping	to access to primary and maternal care	Increased economic activity
history	Robust communication	Longer lifespans	Increased tax revenue
	between healthcare providers and public health	Better quality of life	Direct cost savings to clinic
	officials	Increased funding received by NGOs through visibility of	organizers
		accurate impact metrics	Improved public health understanding and responsiveness Ecotone AMAUTICS

SUSTAINABLE MODEL

Our Software-As-A-Service (SaaS) model helps to keep costs low for organizations, making sure it is a sustainable cost to bring impact to their work. Additionally, we keep our own costs low with data storage in the cloud, keeping features universal, and building only features needed by the majority of our customers.
